## CONTACT

**Phone:** +31 6 24 95 90 14

**Email:** [contact.miladd@gmail.com](mailto:contact.miladd@gmail.com)

**Address:** Residence Mazairac Bergen op Zoom

**LinkedIn:** [www.linkedin.com/in/milad--](https://www.linkedin.com/in/milad--)

---

## SKILLS

**Languages:** JavaScript – Python – Java – SQL

**Frontend:** ReactJS, HTML/CSS – Responsive Design – Progressive Web Apps (PWA)

**Backend & Databases:** Laravel – REST APIs – Supabase – PostgreSQL – Oracle Database

**Cloud & DevOps:** Microsoft Azure – AWS – GitHub – Vercel – CI/CD (CircleCI, Jenkins)

**AI Development:** AI Agent, Claude Code – Google AI Antigravity – ChatGPT

**Tools:** Git (Worktrees) – VS Code – Figma – Notion – Slack – Google Workspace – Jira/ZenHub

**Enterprise Platforms:** Wordpress – Salesforce – Microsoft Navision 14 & Business Central 23

---

## EXPERIENCE

### Independent Project, Taxi Livo B.V | 2025 – Present

*Software Engineer, Full-Stack development*

- Built a React-based PWA integrated with Supabase/PostgreSQL for authentication, storage, and real-time services, enabling digital trip log management on devices.
- Applied Google Antigravity AI agents to streamline feature development.
- Managed the full software lifecycle from architecture and development to testing and deployment using GitHub, Git Worktrees, Notion, and Vercel.
- Deployed the application to a pilot group of 5 active users, driving continuous improvements with the goal of scaling to 100+ users.

### Boat Refugee Foundation | 2026 – Present

*Web Developer (Volunteer) – Frontend web & app*

- Manage and prioritize the product backlog, handling incoming business requests and delivering continuous website improvements through Scrum practices in Notion (4 hours/week).
- Improve website usability, navigation structure, and donation call-to-actions (CTAs) through custom CSS, increasing accessibility and supporting donation conversion goals.

### Interior Design Moooi.com | June 2022 – May 2025

*Application Engineer & Product Owner, Cloud Infrastructure*

- Successfully managed the enterprise ERP migration from Navision 14 to Business Central 23, coordinating with external developers and internal key users.
- Deployed a global workspace and device reservation system in Outlook across international offices (Amsterdam, London, New York, Breda, Stockholm) using custom PowerShell scripting.
- Served as a Salesforce Administrator, modifying objects, fields, and layouts, and monitoring synchronization with the ERP system.
- Engineered an organization-wide Multi-Factor Authentication (MFA) project.

## Paardekooper B.V. | Jun 2021 – May 2022

Web Administrator – Enterprise Applications

- Managed and resolved 4+ application tickets daily across web and enterprise applications.
- Delivered first and second-line support for VMware Horizon, Microsoft 365 and Azure.
- Provided remote troubleshooting and support using Remote Desktop Manager and TeamViewer

## Library West-Brabant (Public Sector Organization) | Sept 2019 – Jan 2020

Product Designer, Intern

- Gathered stakeholder requirements and translated them into Figma designs.
- Developed technical architectures and backend solutions using PHP (Laravel).
- Implemented Microsoft Teams Webinars during COVID-19 and onboarded employees

## Zeeland Safety Region (Government Organization) | Aug 2013 – Dec 2014

Applications Engineer – Enterprise Applications, Intern

- Analyzed 500+ hardware assets across 64 fire stations, improving asset registration accuracy and data quality within TOPdesk (CMDB).
- Delivered internal work instructions and documentation

---

## EDUCATION

### Vanderbilt University (via Coursera) | Online | Present

Claude Code: Software Engineering with Generative AI Agents

### HZ University of Applied Sciences | 2027–2021

Bachelor of Science in Software Engineering

### Scalda Technology & Design College | 2010–2016

IT Infrastructure & Systems (EQF Levels 2–4)

## CERTIFICATES

- Python, Programming for everybody
- Introduction to Generative AI with GPT
- Using AI in the UX Design Process
- Azure Fundamentals

---

## SELECTED PROJECTS

### Fair Care Solutions: Health Questionnaire App for elderly people (Key Achievement) | Figma, Android Studio, Java, Agile, Scrum, Github, Zenhub

Frontend Developer & Product Owner

- Developed an Android application for elderly users with a focus on accessibility and usability.
- Led backlog management and translated business requirements into technical tasks.
- Conducted user research and designed wireframes and UI prototypes in Figma.
- Collaborated using GitHub and ZenHub to deliver the application, documentation, and final client presentation.

### E-Scooter Rental Mobile App | Figma, UX Research, Product Strategy

Product Owner

- Led the conceptualization and strategy for an innovative mobility application designed to help users to travel from A to B using electric scooters.
- Created an empathy map and did user research to understand the needs and identify the app's main features.
- Turned business requirements into wireframes and designed a high-fidelity prototype with a focus on easy-to-use navigation.
